More About This Position

You will be the lead developer on the iPhone version of the Taxi Magic app. You will be responsible for working iteratively with marketing, the server team, and creative to create quarterly builds of the application. You will be making product decisions to determine what we build and how we build it. You will be expected to follow emerging trends in iPhone development and staying on top of your game. You will also be managing our staff that ports the application to other platforms. Our engineering team is based in Old Town Alexandria, VA. If you are local, that would be great, but not required. Several of us work remotely over Skype. Our office is extremely casual, fun to work at, dog friendly, and ping-pong friendly.

About Taxi Magic (RideCharge Inc.)

Taxi Magic is leading the technology revolution to modernize and transform the taxi industry. We develop our products with a rider-centric perspective and the latest technologies to ensure that taxi fleets have the industry's best tools to run their businesses and delight their passengers. Visit taximagic.com to learn more about our products and what we do.

Compensation

Plenty. Strong salary, benefits, and stock option bonus plan.
